## **DETAILED ACTION**

### ***Allowable Subject Matter***

1. The following is an examiner's statement of reasons for allowance: Applicants' argument about the use of the specific compound of formula (I) as a control for preparing a reliable calibration curve in the immunoassay system for detection of dioxins in a sample is persuasive and thus prior art rejections over Carlson et al. are withdrawn. Upon further consideration it is noted that PCB analytes of Carlson et al. is structurally different from dioxin analyte of instant application. Contrary to applicants' stated definition of Dioxins in the specification (see page 1), PCBs are not generally considered as subset of Dioxin compounds. Dioxin compounds (e.g. PCDDs, PCDFs) are structurally different from polychlorinated biphenyls (PCBs) as shown in attached references, wherein two benzene rings are bonded together at the sixth position (see attached U and V documents cited in PTO-892).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Examiner's amendments***

2. Specification (filed 2/24/05) has been amended as follows:

In specification, page 1, after the title, insert the following:

RELATED APPLICATIONS

Art Unit: 1641
